

Retail

LED solutions for retail environments

Key features:

- Easy to clean profile
- No glass or harmful chemicals
- Available in cool white to warm white and in a range of finishes.
- Robust yet contemporary design

Our LED fittings, although robust enough for industrial environments have been designed to look attractive and be easy to clean, making them ideal for retail environments.

Major retailers have been working with us to meet their lighting requirements. Taking advantage of our flexibility to be able to vary the LED and external colour of the fitting to match their environment whilst significantly reduce their energy costs.

Carbonlights™ can replace any conventional light from a 400w metal halide to fluorescent tubes to spotlights and this enables us to deliver appropriate lighting solutions for any retail environment.

Example of savings v's T8 fittings

T8 Fluorescent Tube Fitting (400 fittings)	
	Annual Total
Running Costs	£47,139
Maintenance Costs	£3,494
Total	£50,634

Total	£14,109

Benefits:

Energy Savings up to 80%

Maintenance Savings up to 100%

Payback (years) 3-4 years*

*Based on 24/7 operation

Clean and contemporary with high energy and maintenance costs savings.

"Fittings produced in the UK with a modular design allowing for simple maintenance and even upgrading of components as LED technology moves forward. Highly efficient product compared to others on the market. In house technical engineer who is intimately conversant with the product, giving us the reassurance to commit to this solution."

Nick Baker, Operations Manager, Webbs of Wychbold.
